Education

DTS in Computer Development

ISTA NTIC Hay Raid (Sept 2017 - Sept 2020)

Bachelor's Degree in Life Sciences and Earth Sciences

High School Hassan II - Rabat (2017)

Work Experiences

ATNER Company

Web Developer Sep 2021 - Present

IT Developer and Automation Supervisor

I excelled in creating impactful PowerShell automation scripts and developing customized applications to support various departments. I also played a vital role in analyzing construction data using Power Query. As my responsibilities grew, I became a supervisor for a small team, effectively managing tasks and ensuring project success. This experience reflects my versatility in technical roles and leadership, emphasizing my commitment to delivering comprehensive solutions.

IAC Project

Freelance April 2021 - Sep 2021

FullStack Developer

In partnership with IAC Company International Academy, I designed an application to streamline student and teacher management, class scheduling, and financial transactions. The application efficiently tracks student enrollment, teacher details, session schedules, and handles financial aspects such as teacher payments and student fees. This project significantly enhanced the language center's administrative processes.

2SBPLUS Project

Freelance August 2020 - Jan 2021

FullStack Developer

During my time with 2SBplus, I led a project involving database creation, payment functionality implementation, and scheduling management. This allowed me to showcase skills in database design, financial feature development, and planning process enhancement as a Systems Architect.

REWEB Company

Freelance August 2020 - Jan 2021

WordPress Training: Dynamic Websites

At ReWeb, I gained expertise in creating WordPress websites, covering design, customization, and optimization. This training enhanced my skills for developing dynamic and user-friendly sites
